Summary

Full Stack Software Developer with extensive experience building scalable, high-performance enterprise platforms using **Python, React, AWS**, and modern cloud-native architectures. Expertise in designing and implementing secure microservices, responsive front-end applications, serverless solutions, event-driven systems, CI/CD pipelines, and distributed data pipelines. Focused on delivering scalable, automated, reliable, and cost-effective solutions.

Education

Bachelor of Science in Computer Science Honours
York University

April 2025
Toronto, Ontario

Certifications

AWS Solutions Architect Associate | [Link](#)
Amazon

January 2025
Toronto, Ontario

Experience

Junior Systems Developer
Municipal Property Assessment Corporation (MPAC)

April 2025 – Present
Pickering, Ontario

- Designed and developed a **multi-tenant ABAC administration portal** using **Python, AWS Lambda**, and **API Gateway** to centralize authorization, role management, and deployment operations across Insight25 applications.
- Led enterprise authorization workflows by defining **ABAC policies**, permissions, roles, and group hierarchies while coordinating with frontend, backend, and DevOps teams to enforce secure access controls across UI and API layers.
- Architected a scalable audit logging platform using **DynamoDB, DynamoDB Streams**, and **S3** to capture real-time events, maintain long-term audit retention, and support **SOC and ISO compliance standards**.
- Developed a **proxy validation microservice** bridging frontend applications with the **Spectral** backend validation service, improving data integrity, eliminating hardcoded UI logic, and enabling extensible validation workflows.
- Built a scalable **bulk processing pipeline** using asynchronous **SQS** queues and batch processing to automate ingestion, validation, and notification workflows with **Amazon SES** email delivery.
- Managed **CI/CD deployment workflows** and **Git branching strategies** across development, testing, and production environments, enabling automated deployments, streamlined release cycles, and reliable enterprise application delivery.
- Authored **API documentation** and technical specifications while integrating **Postman** regression and unit tests into the CI/CD pipeline, improving API reliability and standardizing cross-team onboarding.

Full Stack Developer Intern
Arkhet AI

September 2024 – December 2024
Remote

- Developed full stack features using **React, ExpressJS**, and **PostgreSQL** for an AI-powered design platform.
- Integrated **Anthropic's LLM** to transform low-fidelity wireframes into high-fidelity, interactive web prototypes.

Projects

Full Stack Airbnb Clone | *Angular, Typescript, Java Spring Boot, PostgreSQL, Docker, AWS*
<https://github.com/phammings/Airbnb-Clone> | [Link](#)

- Developed an Airbnb clone in **Angular** and **Java Spring Boot** with a **PostgreSQL** database and **CI/CD** pipeline.
- Dockerized** app on **EC2** and created a **Lambda** instance scheduler with **CloudWatch**, cutting cloud costs by 50%.

AWS Cloud Resume | *React JS, AWS, Terraform, GitHub*
<https://github.com/phammings/cloud-portfolio> | [Link](#)

- Deployed a **React** site with **S3, CloudFront**, and **Route53**, securing HTTPS via **AWS Certificate Manager**.
- Built API with **API Gateway, Lambda**, and **DynamoDB**, managing **CI/CD** via **GitHub Actions** and **Terraform**.

Technical Skills

Languages: Java, C, C#, Python, TypeScript, JavaScript, HTML/CSS, SQL, NoSQL, GraphQL, Shell Script
Frameworks: React.js, AngularJS, Tailwind CSS, Java Spring Boot, ASP.NET Core
Databases: DynamoDB, MongoDB, PostgreSQL, MySQL, Firebase, Supabase
DevOps & Tools: AWS, Terraform, Docker, Git, Linux, CI/CD, Jira, Figma
